

We are Indiana residents currently on the Indiana no call list. We have been extremely pleased with the results of the local list. We feel that we pay for our phone service and no one should be allowed to call us with a sales pitch on a service that we pay for. We are against the Federal list as it would not prohibit as many calls as our local list does. I have my elderly mother living with me and constant calls pose a great inconvenience as she is often trying to rest. And if she is home alone it is difficult for her to get to the phone so often. We are in favor of continuing on with the Indiana no call list and are against the federal list.
